

## Job Title: Sr. Manager of Education

### Who We Are

Bioness Medical Inc. offers innovative neuromodulation medical devices that aid individuals in the recovery from chronic central nervous system disorders such as Stroke, Multiple Sclerosis, Spinal Cord Injury, Traumatic Brain Injury, and others. By fusing breakthroughs in technology with physical medicine and rehabilitation, Bioness is committed to providing patients with new levels of physical independence and productivity.

If you are looking for a challenging opportunity that will ignite your passion for helping others, connecting and maintaining cool and innovative services, and you are exceptionally creative, are a great problem solver and can make things happen - apply today!

### About The Role

We are seeking a Sr. Manager of Education with a strong background in clinical education, instructional design, and curriculum development for medical and rehabilitation training. The ideal candidate will have extensive experience in developing educational materials, including scripts for CEU accredited e-learning modules, webinars, and in-person training courses. This role requires a deep understanding of neurorehabilitation, functional electrical stimulation (FES), and adult learning principles to create engaging, effective, and evidence-based training content.

### Your Mission:

1. Develop high-quality training scripts for web-based courses, instructional videos, and live presentations.
2. Collaborate with subject matter experts (SMEs), clinicians, and educators to ensure accuracy and effectiveness of training materials.
3. Design curriculum content that aligns with best practices in neurorehabilitation and clinical education.
4. Create engaging and interactive learning materials, including video scripts, case studies, and assessments.
5. Ensure compliance with regulatory standards for medical education and training.
6. Work closely with multimedia designers to develop instructional videos, animations, and interactive learning tools.
7. Analyze and present educational program outcomes to internal teams and stakeholders.
8. Support product education initiatives by developing content that enhances clinical and sales training.
9. Revise and update existing training materials to align with new research, technologies, and organizational goals

### Education and Experience (Knowledge, Skills & Abilities)

1. Bachelor's or Master's degree in Occupational Therapy, Healthcare Administration, Education, or a related field.
2. 5+ years of clinical expertise in neurorehabilitation, upper extremity treatment, and FES applications.

3. Proven experience in developing training programs, e-learning modules, and instructional scripts for healthcare professionals.
4. Strong technical writing skills with the ability to translate complex medical concepts into clear, engaging content.
5. Experience working with multidisciplinary teams, including physicians, therapists, sales teams, and engineers.
6. Knowledge of adult learning principles, instructional design methodologies, and curriculum development.
7. Familiarity with CEU accreditation standards and regulatory compliance in clinical education.
8. Strong project management skills with the ability to meet deadlines and manage multiple projects.
9. Proficiency in using e-learning platforms, video editing tools, and presentation software is a plus.
10. Experience working with medical device companies or rehabilitation organizations.
11. Background in marketing and sales training content development preferred but not required.
12. Prior experience leading global clinical education initiatives preferred but not required.

### Place in the Organization

Reports to: Vice President of Marketing

Direct Reports: Yes
